Glass Guardians: J

Compost Champic

Your Progress: 

60%

# Plastic Patrol: Sorting PillBottles & Caps

Join the Plastic Patrol and learn to sort plastic bottles and their caps correctly for recycling!

### Rinse Them Clean

Always rinse your plastic bottles to remove any food or drink residue. Clean bottles make better recycled materials!

### Know Your Numbers

Look for the recycling symbol with a number (usually 1 or 2) on the bottom of bottles. These are most commonly accepted.

They tell you the type of plastic. Numbers 1 (PET) and 2 (HDPE) are most common for bottles and are widely recycled!

### Keep Caps On or Off?

Some recycling centers prefer caps on, others off. Check local guidelines, but generally, small caps can stay on now as technology improves.

### Squash to Save Space

Squashing your plastic bottles helps save space in your recycling bin and during transport, making recycling more efficient!

## Eco-Tips from EcoPals!

Q A single plastic bottle can take up to 450 years to decompose in a landfill. Recycling saves energy and natural resources!

Q Not all plastics are recyclable in your curbside bin. Plastics like grocery bags or styrofoam often need special drop-off locations.
